

OVERVIEW

The goal of the game is to get the lowest score by viewing, swapping and matching cards.
There are 70 cards total each with a point value ranging from -1 to 14.
The quantity of each card is as follows:

- 1 & 0 = 3 each
- 1 to 12 = 5 each
- 13 & 14 = 2 each

SET UP

Deal four cards face down to each player. Position the cards in a 2x2 rectangle.

GAMEPLAY

At the beginning of each round, players can view their bottom two cards once.

For the first turn, the player left of the dealer draws a card, views it without showing anyone, and decides to:

- either exchange it with a card in their hand before discarding the card in their hand onto the discard pile
- or directly playing it face up onto the discard pile.

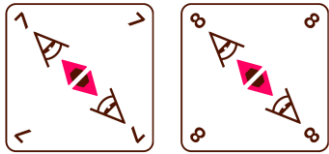

If the card is an ability card (7 through 14), they can use the ability (more info below). To use an ability card, it must be drawn from the deck and played directly into the discard pile. Cards discarded from a player's hand do not have abilities.

Play continues in a clockwise direction and for future turns, players must draw a card from the deck.

ABILITY CARDS

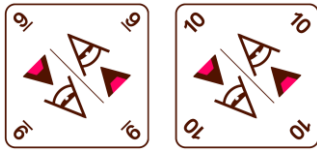

Certain cards allow players to view and swap cards. Ability card values start at 7 and end at 14. Players do not have to use the ability if they do not want to.

LOOK AT YOUR OWN

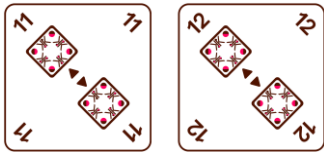

Sevens and eights allow players to view one card in their hand.

LOOK AT OTHERS

Nines and tens allow players to view one card in an opponent's hand.

BLIND SWAPS

Elevens and twelves allow players to swap any two cards on the table without viewing either card. The two cards can be between any hand.

LOOK & SWAP

A thirteen allows players to view any card on the table and swap the viewed card with another card, without viewing the other card. Players do not have to swap the viewed card.

DOUBLE LOOK & SWAP

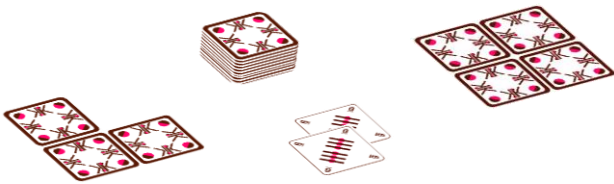

A fourteen allows players to view any two cards on the table and swap the viewed cards. Players do not have to swap the two viewed cards.

MATCHING

At any time in the game, regardless of turn, players can reduce the number of cards in their hands by being the first to match atop the last discarded card with a card from their hand or from an opponent's hand. A successful match placing a card of the same value of the last discarded card onto the discard pile. Whoever taps the table first is allowed to match. This is a race and can only happen once per discarded card.

Matching is limited to one attempt per turn per player.

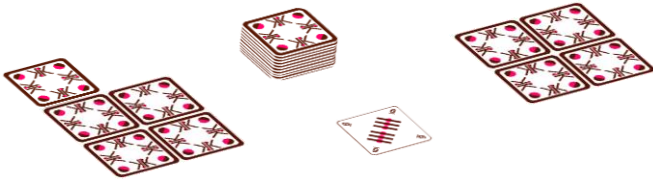

If you successfully match an opponent's card, you give your opponent a card from your hand. The card you give your opponent may not be viewed.

INCORRECT MATCHING

If a player incorrectly attempts a match from their hand, they must return the card and take a penalty card without viewing it from the deck and add it to their hand. If a player incorrectly attempts a match from an opponent's hand, they must also take a penalty card without looking.

If another person wants to match, they may now do so.

CALLING "KOMBIO"

In replacement of their turn, players can end the round by calling "KOMBIO". Everyone is allowed one final turn. The KOMBIO Caller's hand is locked from viewing, matching and swapping. Once each player has taken their last turn, cards are revealed.

Reducing your hand to zero cards is an automatic win.

SCORING

After the last turn, players reveal their cards and add up the values of their cards to get their hand score.

If the KOMBIO Caller has the lowest score, the Caller wins. If one or more players ties or beats the KOMBIO Caller, they win.
